DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,5,9,10,11,12,15,19 & 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Simadiris et al. (US Patent No. 2003/0042361). Simadiris discloses a liquid gallery refrigeration system for cooling food carts for an aircraft and comprising: gallery cart (20), a blower (24), a heat exchanger (26), liquid refrigerant/working fluid(27) controlled by a flow control valve (28), a chiller unit (30) with working fluid, compressor (34), a condenser (36), expansion valve (38), an evaporator (40) having an expelling heat exchanger (42) associated with said evaporator, plurality of gallery carts (20), a recirculation unit (32), supply ducts (48) for supply cooling to plurality of gallery carts and further cold supply air remain at or near a specified temperature (30 degrees (f)) and can be controlled for increase (see page 4, left column).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3744

Claims 7,8,17 & 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Simadiris et al in view of "Official Notice". Simadiris discloses the claimed invention as stated above but lack to mention coolant being liquid water or a mixture of water and glycol – Simadiris stated on page 3, other heat transfer fluid may suitable. Official Notices is take because it is well known in the art to utilize water or a mixture of water and glycol. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to modify the discloses liquid gallery refrigeration system disclosed by Simadiris with water or a mixture of water and glycol since it is well know in the prior art to utilize as a means of efficiently cooling at an economical and feasible cost.

Allowable Subject Matter

Claims 21-60 are allowed over the prior art of record

Claims 3,4,6,13,14,16-18 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
